

MSVR Club Car Championships
Silverstone National
13th – 14th April 2024

Bulletin 3 - Sports 2000 - Change to normal Silverstone Qualifying release procedure

When the circuit is clear the cars will be released from the Assembly Area at Brooklands behind the Safety Car onto the circuit at slow speed and will be directed by the Safety Car to the Pit Lane entrance, where the cars will drive slowly in single file down the fast lane and the first car will stop prior to the Red Light at the bottom of the Pit Lane. Please follow the marshal's instructions.

Once the last car is in position in the Pit Lane the Red Light will change to Green and the cars will be released onto the circuit to commence Qualifying.

The timing for the session will commence as the first car leaves the pit lane.

The reason for this change is on the grounds of safety due to the large number of cars involved being released and the short lap time on the Silverstone National Circuit.

Terry Scannell
Clerk of the Course.
