Bulletin 3 – Amendments to Final Instructions (1)

Equipe F2 Atlantic

Cars will be put into grid order in the pit lane when instructed by officials, before commencing **TWO** green flag laps. At the end of the second lap the cars will stop on the grid where Marshals will show them their grid slots.

Once all cars are in position, the countdown will begin, and the normal race start procedure takes over. To confirm the grid will be formed up behind the safety car, normal countdown will commence, and a green flag will be shown. The cars will follow the safety car on the rolling lap. The safety car should join the pit lane at the end of lap. The grid will maintain speed until lights go out for the race start.

This procedure doesn't change the requirement for the cars to go to the assembly area for noise testing prior to the start of their qualifying session, which will commence from the Assembly Area.

Triple M

The race start procedure for Triple M will be a standing start.
