Guest/Invitation Class: Any other Production and Production based Saloon, Hatchback and Sports car that the organisers have given permission to join the championship or single events.

All vehicles entering the series must be power tested prior to their first event by Total Track Ltd who run the MINI CHALLENGE Championship. The test will measure power at the hubs.

Tests will be scheduled at 3 pre-season power testing days at 3 MSV circuits and on the Friday before a selection of race meetings. The dates for these will be communicated to competitors by MSV. The cost of these power tests will be £125 inc VAT. Repeat tests will also be charged at £125 inc VAT.

2022 Turismo X Sporting & Technical Regulations

If you are unable to attend a scheduled power testing day, you may arrange a test at Total Track's premises as detailed below. These tests will be charged at £100 inc VAT. Repeat tests will also be charged at £100 inc VAT.

Testing at Total Track's premises must be pre-booked by email, if competitors arrive unannounced they will be turned away.

You must provide MSVT with the "Performance Certificate" prior to your first race meeting and must provide a revised certificate should you make any changes to your powertrain package.

The operator of the power testing equipment (Total Track) shall be a judge of fact under the event regulations.

Following Qualifying and Race sessions, the operating area for the power test, will be treated as parc ferme and will be subject to parc ferme conditions. For the avoidance of doubt, this includes the route from the pit lane or parc ferme to the power testing area/location, and route back from the power testing area/location to the main parc ferme area/location.

Power testing procedure (procedure to be the same at Total Track Ltd premises or at each event at circuit):

1. Car owner/operator will be asked to confirm all coolant, oil and fuel levels are correct and fine before fitting car to Dynapack. Car will be fitted using 4 or 5 stud wheel adaptors. Cars running Single hub nuts & wheels will need to contact Total Track Ltd to confirm suitable fitting attachment is available for testing before bringing the car to test. An additional charge will be made to cover cost of adaptor.
2. Car will be run until normal coolant operating temperature is reached and oil temperature (where measured) is minimum 50 Deg C
3. Car must run with bonnet or engine covers down as per how it would be on track
4. Power run settings will be as follows
 - Car must be tested in a gear that exceeds 150KPH before the test finishes based on theoretical gearing calculations. A default gear of one below top will be used as a default.

2022 Turismo X Sporting & Technical Regulations

- Hold between 2750 and 3250RPM for 4 seconds to stabilize the dyno and engine load
- Power will be tested to the rev limiter
- The power run test will be set at an acceleration rate of 500RPM per second e.g. 3000rpm to 8000rpm will be approximately 10 second test
- The car will be tested 3 times to provide a heat soaked condition for real world measuring. The highest power reading will be used to calculate the power to weight ratio for calibration tests, whereas post race/qualification the middle reading will be used.
- Should the power testers deem it necessary, additional power runs may be completed. Additional runs will be conducted at the testers discretion
- Application of a tolerance of 2% to reflect real world conditions will be at the pure discretion of the Meeting Organisers and Total Track Dyno operators.

5. Car will be allowed to cool down until owner/operator is satisfied that the engine can be shut off.

Once the car has been tested the driver/team will sign the "dyno agreement form" confirming that they agree the test has been conducted per these regulations, before the car is released from the testing area. Failure to do this may result in further testing of the vehicle, of the vehicle being impounded by the Clerk of the Course or the Eligibility Scrutineer for further interrogation, including but not limited to external testing by the dynapack UK distributor.

Where the conclusion of the further interrogation/power testing confirms non-compliance, the entrant shall be responsible for all costs and fees arising from the interrogation/power testing procedure

Dynapack Dyno Calibration:

The Total Track Ltd dyno will be serviced, maintained and calibrated in accordance with Manufacturers specifications. Accuracy of torque/power measurement to be maintained within the 0.5% accuracy tolerance allowed.

The correction factor for all dyno tests will be "SAE adaptive".

PLEASE NOTE: All vehicles must be tested between 1st February 2022 and the day prior to the last race meeting. Any dyno reports conducted before this time will not be valid for the 2022 season.

All vehicles must be fitted with a rev limiter.

All vehicles must be under the maximum power to weight ratio as specified by MSV.

The organisers reserve the right to alter a competitor's class (based on performance). In any case, a competitor will be informed of the class change prior to the race.

Should Total Track be unable to conduct power tests for a prolonged period, (or in the case of force majeure), the organisers reserve the right to allow power testing at AET Motorsport, Beckbridge Rd, Normanton WF6 1TE. This may only take place with prior written consent from the championship organisers.

PLEASE NOTE: At some rounds, competitor's vehicles may be weighed and tested for their power output at the hubs.

2022 Turismo X Sporting & Technical Regulations

In the event that an eligibility power test for the current season is not possible prior to the competitor's first round, and where the car is confirmed to be unmodified, drivers who have raced in the same car in a MSVT race series/championship within the last 12 months may submit last season's eligibility power test on the following conditions:

- I. That a signed declaration is submitted confirming that no modifications have taken place since the power test was conducted
- II. That the competitor understands that in the interim spot checks will be conducted and checked against the submitted eligibility test
- III. A payment for the current season's eligibility test is made in full to the dyno provider prior to the competitor's race
- IV. An eligibility test is completed before the end of the current season

5.4 PRESENTATION:

Cars must be presented to a high standard. Unpainted panels, unrepaired damage or cars not achieving a satisfactory level of preparation and presentation, as judged by the championship scrutineer, may receive a warning and may ultimately result in exclusion.

Presentation for a vehicle for scrutineering is a declaration by the entrant that the vehicle is eligible for that event and fully complies with the championship regulations.

5.5 SAFETY REQUIREMENTS:

The following Articles of Motorsport UK Blue Book 'Section K Competitors: Safety' regulations are highlighted as being applicable (but not to the exclusion of any other) Motorsport UK General Regulations that automatically apply – see 5.1.2 above):

It is implicit that these devices must be approved by the scrutineers. Active aero/DRS systems are not permitted.

5.8.3 A “roof scoop” may be allowed for the purpose of ventilation for the habitable.

5.8.4 Modifications to the silhouette may be permitted subject to all of the following conditions:

Such modifications are:

- Fitted for safety or efficiency (for example to aid cooling of either the interior cabin or engine bay without a significant performance advantage)
- Approved by the championship organisers and scrutineers in advance.
- In keeping with the spirit of the championship (modifications that give a significant performance advantage at a high financial cost will almost certainly be illegal or outlawed in future regulations).

5.8.5 Headlights can be removed but must be replaced with blanking plates in order to retain the existing, exterior shell of the vehicle. All modifications must also comply with the regulations relating to presentation. Any replacement panels must be securely fixed.

5.8.6 The removal of exterior decorative strips and bumper overrides is permitted.

5.8.7 Reworking or modification to exterior bodywork is prohibited but with the exception of arch/track widening to aid the fitment of wider wheels/tyres.

5.9.2 It is recommended that all cars fit a FIA compliant window net to the driver's side of the roll cage

5.10 **ENGINE:**

5.10.1 All entries must be powered by a *production car engine originally available through normal commercial channels of a car manufacturer in quantities of not less than 1000 units within 12 consecutive months* that is fitted in the original location with a rev limiter present.

5.10.2 Fitting forced induction to a vehicle originally homologated as Normally Aspirated is permitted, subject to that vehicle submitting a declaration of parts used.

5.10.3 Induction - air filter and air filter box may be removed and air ducting/trunking is free provided it does not extend beyond the periphery of the bodywork. Anti surge pipes are permitted as also are return pipes from the carburettor/injection system.

Forced induction is permitted. Turbochargers, superchargers and related components may be sealed by scrutineers, where this has been the case seals may not be broken without permission in writing by the Championship Organisers. Damaged, missing or broken seals, may cause a component to be judged non compliant.

Forced induction vehicles are subject to the correct penalty ballast being applied. For vehicles under 2000cc, 20kg penalty ballast must be applied. This shall increase by 10kg for every 500cc over and above 2000cc i.e. - Up to 2000cc = 20kg, 2001-2500cc = 30kg, 2501-3000cc = 40kg, etc.

Forced induction penalty ballast must not be included in the weight declared for class eligibility and cannot be absorbed within the mass of the vehicle. All ballast must be clearly labelled, securely fitted by at least four M8 bolts in the passenger foot well or passenger seat position and be visible for inspection at any time – (References Motorsport UK Yearbook Regulations J. 5.15.1 – 5.15.4).

A - Sump: Cross drilled through two adjacent retaining screws or studs.

B - Rocker/cam cover: Cross drilled through two adjacent retaining screws or studs.

C – Gearbox: Cross drilled through two adjacent retaining screws or studs.

Damaged, missing or broken seals, may cause a component to be judged non compliant

5.10.11 Engines may be sealed from the car's first event. Thereafter the seals must be in place at all times. If a seal needs to be removed for any reason, the entrant must inform the championship scrutineer who will then re-seal at the first opportunity.

5.10.12 The organisers reserve the right to request a competitor to carry out a rolling road analysis of the vehicle at a rolling road specified by the race organisers at the competitor's expense.

5.10.13 Modification or exchange of the engine, gearbox or any component; or the breaking of any engine or gearbox seal, is prohibited. If for any reason the Modification or exchange of the engine, gearbox or any component; or the breaking of any engine or gearbox seal is required, pre-authorised by the organisers and/or eligibility scrutineer must be requested formally in writing prior to work being started and confirmed on completion with a new eligibility power graph for that vehicle.

5.10.14 Vehicles that have variable engine mapping or boost controls (turbo or supercharged vehicles) are only permitted to use the settings the vehicle was set to when tested for the mandatory pre-season dyno run. Controls within the cabin which can affect engine output/performance (whether in operation or not) are prohibited. For the avoidance of doubt championship regulations cover all practice, qualifying and race sessions at all times during the entire race event - References Section (J. 3.1.3.)

5.10.15 Water/Methanol injection is prohibited in all forms.

If present, the competitor must provide a laptop and cable to allow the eligibility scrutineer access into the files within the ECU. Failure to provide access into an aftermarket ECU at the request of the eligibility scrutineer may result in exclusion.

2022 Turismo X Sporting & Technical Regulations

- 5.14.4 ECU's are not permitted to hold multiple maps or multiple engine modes, and must retain the unmodified settings that the vehicle was set to when tested for the mandatory pre-season dyno run.
